

Meet our director, Dr. Santiago J. Munoz.

A fellowship-trained transplant hepatologist, Dr. Munoz specializes in the diagnosis and treatment of benign and malignant liver diseases, including a focus on liver failure patients. Prior to joining Capital Health, Dr. Munoz developed and led some of the foremost liver transplant programs in the Philadelphia area, including Jefferson, Einstein and Temple. He is widely published and author of over 200 peer-reviewed papers, monographs, book chapters and editorials. Dr. Munoz is also a frequent speaker at national and international conferences on topics of liver disease.

Advanced Care for a Wide Range of Diseases

The Center for Liver Disease within the Capital Health Center for Digestive Health has the technology and expertise to diagnose and treat complex liver diseases, including the new antiviral therapies for hepatitis C, abnormalities of the liver tests of obscure etiology, acute fulminant liver failure, liver adenomas, tumors of the bile ducts, primary liver cancer, as well as less common liver conditions such as Wilson Disease, autoimmune hepatitis, primary sclerosing cholangitis and primary biliary cirrhosis. The Center also has access to the latest treatment options and provides comprehensive care management for pre- and post-liver transplant patients.

Access to ELAD and the Latest Clinical Trials

A key advantage of the Capital Health Center for Liver Disease is its participation in the latest research and clinical trials. The Center is a participant in the Phase III pivotal clinical trial of the ELAD® system.

Dr. Munoz (right) reviews an MRI liver scan with Dr. Abhi Srinivas

This clinical trial is testing whether this experimental therapy can stabilize patients with liver failure or whose own liver is not functioning and needs additional time to regenerate and recover.

Collaborative Care for Your Patient

The Center for Liver Disease takes a collaborative approach to patient care. Your patient is your patient. That's why our team works with you to ensure the best outcome for your patients through cooperative teamwork and information sharing.

As a trusted partner, Capital Health is proud of its reputation for returning patients back to their referring physicians. Our goal is to enhance the practice of our referring physicians by providing tertiary-level services in a local community setting to help them better serve their patients.

To arrange a consultation or for more information about the Center for Liver Disease, e-mail Dr. Munoz at smunoz@capitalhealth.org or call the Center at 609.537.5000.

The Center for Liver Disease at Capital Health Medical Center – Hopewell now offers your patients convenient access to comprehensive, high-level hepatology care. Under the direction of Dr. Santiago Munoz, the Center can treat a wide range of liver diseases and provide expert care management for pre- and post-transplant patients in a new, state-of-the-art medical center.
