

JOSHUA A. EISENBERG, MD, FACS

Dr. Joshua Eisenberg received his medical degree from Jefferson Medical College and completed his internship and residency in surgery at Thomas Jefferson University Hospital.

He completed his fellowship training in vascular surgery at Pennsylvania Hospital (part of the University of Pennsylvania Health System) in Philadelphia, PA.

Prior to joining us, Dr. Eisenberg was chief of the Division of Vascular and Endovascular Surgery at Methodist Hospital (one of the Thomas Jefferson University Hospitals) and an assistant professor of Surgery in the Department of Surgery's Division of Vascular and Endovascular Surgery at Jefferson Medical College in Philadelphia. He is now director of the Capital Health Heart and Vascular Institute – a multidisciplinary institute aimed at improving the overall care of cardiovascular patients.

Dr. Eisenberg is board certified in general surgery and vascular surgery and a fellow of the American College of Surgeons. He is a member of various professional organizations, including the Society for Vascular Surgery, Society for Clinical Vascular Surgery, Association for Academic Surgery, and Peripheral Vascular Society.

CAPITAL HEALTH SURGICAL GROUP

Joshua A. Eisenberg, MD, FACS

Complex vascular problems require highly specialized care.

But they might not require traditional open surgery. At Capital Health Surgical Group, Dr. Joshua Eisenberg performs both complex open vascular procedures and minimally invasive surgical treatments for a wide spectrum of vascular conditions. Minimally invasive options are available for treatment of potentially life-threatening abdominal and thoracic aortic aneurysms, carotid blockages, and peripheral vascular disease including claudication and limb threatening ischemia. In addition, minimally invasive and office based procedures are available for the treatment of venous diseases including DVT, varicose veins, and spider veins. As a fellowship trained vascular surgeon, Dr. Eisenberg provides an academic level of experience in minimally invasive and traditional open vascular surgery that used to only be available in big cities like Philadelphia and New York City.

Now they're available here in Central New Jersey.

CONDITIONS & SURGICAL TREATMENTS

- Endovascular procedure for repair of abdominal and thoracic aortic aneurysms
- Endovascular procedure for carotid artery disease
- Carotid endarterectomy (CEA)
- Open and endovascular aortic, renal and visceral reconstructions
- Lower-extremity arterial reconstructions
- Endovascular procedures to repair blocked or narrow arteries and veins
- Peripheral arteriography for the diagnosis and assessment of peripheral vascular disease (PVD and PAD)
- Use of catheter-directed therapy to treat deep vein thrombosis (DVT)
- Surgical repair and endovascular procedure for varicose and spider veins
- Revascularization procedure for peripheral vascular disease
- Robotic median arcuate ligament release
- Placement of inferior vena caval filters to prevent pulmonary embolism
