

A Message from our **PRESIDENT AND CHAIRMAN OF THE BOARD**

Al Maghazehe, PhD, FACHE • President and CEO, Capital Health
Samuel J. Plumeri, Jr. • Chairman, Capital Healthcare Corporation Board of Trustees

Colleagues,

National Doctors Day is an annual event that reminds us to recognize the physicians in our lives and express our gratitude for the amazing work they do every day. We all know that a career in health care is demanding during the best of times, but as we move past Doctors Day 2020 and confront the unprecedented health crisis we find ourselves in, it's important to recognize all of our health care workers on the front lines.

Health care professionals here at Capital Health and everywhere are facing incredible challenges in dealing directly with the COVID-19 outbreak. And while those challenges are certainly daunting, the critical services that are part of the everyday work of health care still need to be provided. Through it all, our team is digging deep and doing whatever it takes to care for our patients and families and keep our community safe and well.

There's an old saying that tells us our true nature is revealed in times of adversity, and the response we're seeing from our health care workers throughout Capital Health during this crisis confirms what we already knew. Your professionalism and expertise are unmatched and your devotion to our patients and the community we serve is limitless. On behalf of Capital Health's senior leadership and board of directors, as well as our community, thank you for your heroic efforts as we work through this crisis and beyond.

Stay safe!

Sincerely,

Al Maghazehe, PhD, FACHE
President & CEO
