RE: Program #2848

Dear Ms. Winter,

I am writing to inform you that Capital Health School of Radiologic Technology must immediately relocate to an alternate location. Last week, June 4, 2025, Capital Health learned that space it is leasing from Trinity Health at the former St. Francis Medical Center campus must begin shutdown activities immediately. Capital Health was advised by structural engineers, architects, and demolition experts that significant structural issues with another adjoining building at this campus pose a threat to the integrity and safety of the building these medical services are located in. To protect the safety of patients, visitors, employees and students, the healthcare system has no choice but to cease operations at this location without delay.

Fortunately, we have ample physical resources to temporarily relocate a classroom, and office space with access to energized x-ray equipment to accommodate all School of Radiography operations for the immediate future until a permanent location is identified.

Temporarily, the School of Radiologic Technology will be utilizing office space within 40 Fuld Street, Trenton, NJ, 08638, a medical office building adjacent to Capital Health

Regional Medical Center. Program administration and faculty will have full access to office and meeting space to support operations. Student didactic classes will be held at the Capital Health's Conference and Training Center located at 51 Scotch Road, Ewing NJ 08628. Clinical and lab components of the program will occur at Capital Health Regional Medical Center and Capital Health Medical Center - Hopewell.

We will keep you updated as the situation evolves, and we find a more permanent location.

Please let us know if you have any questions or concerns.

Sincerely,

A handwritten signature in black ink, reading "Theresa Levitsky". The signature is written in a cursive, flowing style.
